

1 RUBY

Ruby is a programming language which started between the years of 1990 and 1999.

1.1 USES OR RUBY

It was made as a programming language which made coding and programming fun which would lead for more productivity. (Honestly I couldn't find much on ruby without it being plagiarized)

1.1.1 CREATOR

Creator: yukihiro matsumoto Java can be used for things like building web applications, data analysis, digital frame work etc.

1.1.2 I.D.E.S FOR RUBY

Ides like ruby mine, aptana studio, emacs and vim function with ruby

1.1.3 OTHER PROGRAMS FOR RUBY

Programs related to ruby are perl and python
